Projects

Air Selangor
Duration : 12 months

Tags : React.js, Angular.js, Java, Oracle, MongoDB, Tomcat, VSCode, Eclipse

Air Selangor is the national electric, water and gas services company for Malaysia. As you know, in any electric, water and gas services company, the company will provide the plans and the customer will buy the service of his desired plan. The company will receive the service amount from the customer and the customer will get the services from the company for the valid request they have submitted.

- Involved in collecting requirements from Business Analyst.
- Responsible for coding and developing using React JS.
- Develop software related to asset management.
- Create logic for Data processing and computations.
- Integration of user-facing elements developed by front-end developers with server-side logic.

Intellismart Accenture
Duration : 6 months

Tags : React.js, Angular.js, Java, Oracle, Tomcat, VSCode, Eclipse

Intellismart, the national electric service provider for Uttar Pradesh (India), offers various service plans to customers. Customers select and pay for their desired plans, and the company delivers the corresponding services based on valid requests.

- **Developed RESTful APIs**: Built scalable RESTful APIs using Spring Boot for efficient client-server communication.
- **Batch Processing**: Implemented batch jobs with Spring Batch for automated billing and data validation.
- **SQL Optimization**: Wrote and optimized SQL queries and stored procedures to enhance database performance.
- **Bug Resolution**: Diagnosed and fixed backend bugs using Java debugging tools, improving system reliability.
